

## Visual Testing Applications

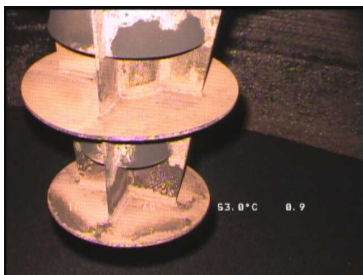

Tank Roof Distorted

Debris in Flare Line

Loose Tray

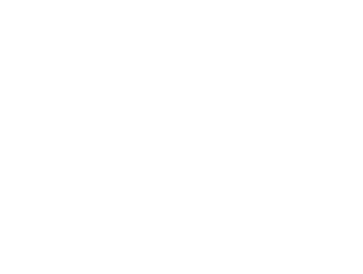

Reactor Nozzle

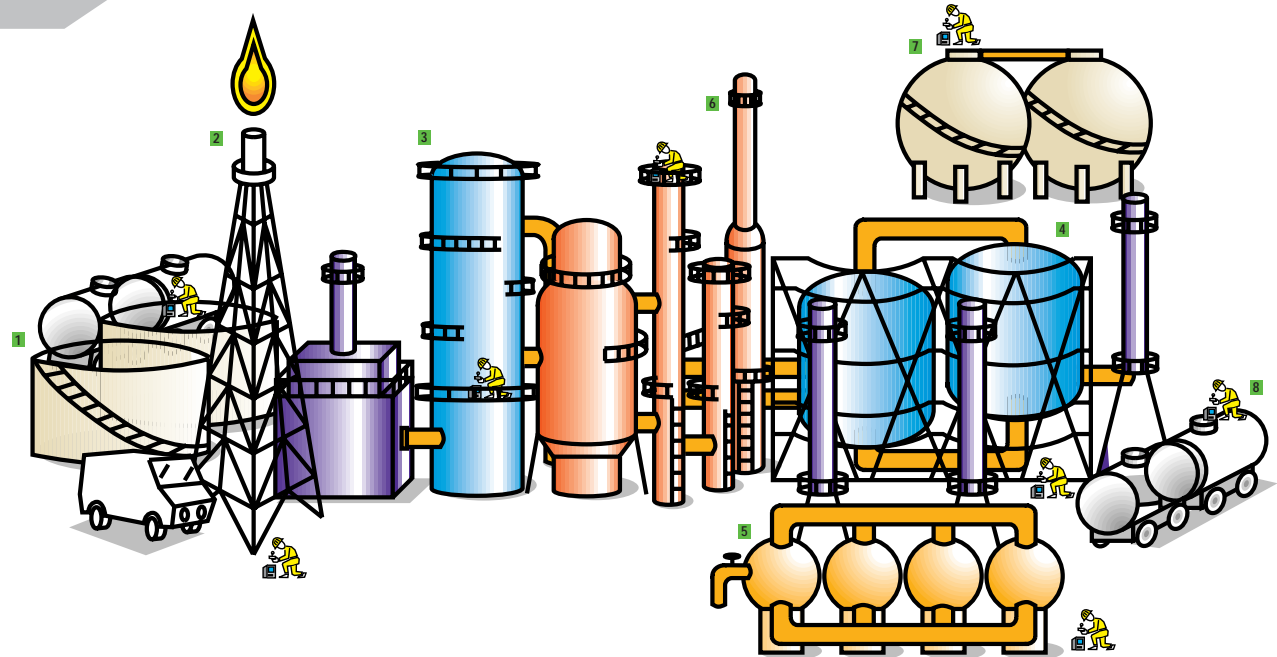

Weld SCC Grooving

Heating Coil Leak

Retrieval Operation

### SPECIFIC COMPONENTS INSPECTED

- |                    |                             |
|--------------------|-----------------------------|
| Reactors           | Tower Trays                 |
| Heat Exchangers    | Cyclones                    |
| Fin Fans           | Piping                      |
| Boilers / Furnaces | Drain & Process waste lines |
| Pressure Vessels   | Valves                      |

### MAJOR PLANT INSPECTED

1. Storage tanks
2. Flares
3. Crude Unit
4. Catalytic Cracker
5. Catalytic Reformer
6. Fractionation Towers
7. Spheres
8. Tankers

*As a specialist Remote Visual Inspection Service VTS has both equipment and expertise to cover online and offline examinations of all plant from the smallest pipe to the largest tank.*
